- Global liquidity hub

2.Tokenization Engine

- Land tokenization
- Commodity tokenization
- Yield tokenization

3.Financial System

- Stablecoin settlement
 - DeFi finance
 - Global payment rails
-

2. Market Opportunity

- Farmland: \$30T+
- Agriculture: \$10T+
- Trade: \$2T+
- Financing Gap: \$500B+

Problems:

- Illiquid land
- Limited financing
- Fragmented supply chains
- Opaque pricing

Opportunity:

Transform agriculture into a financial asset class

3. Architecture

AgriX Exchange

↓

Tokenization Engine

↓

Agricultural Assets

4. AgriX Exchange

Global marketplace for agricultural RWA

Assets:

- Farmland
- Commodities
- Carbon
- Water

Products:

- Spot
- Futures
- Options
- Structured products

Innovation:

- Land traded like equities
- Commodities like digital assets

- Yield distributed on-chain
-

5. Token System

Three layers:

1.AGX Token

- Governance

- Staking

2.Asset Tokens

Farmland Token

Commodity Token

Yield Token

Carbon Token

Examples:

WHEAT-2027-MAR

COFFEE-BRAZIL-LOT01

3.Stablecoin

AgriUSD

6. Global JV Model

Partner instead of acquiring land

Structure:

Government / Landowners

+

AgriX

↓

Joint Venture

↓

Token issuance

Revenue:

- Crop sales
 - Land appreciation
 - Carbon credits
-

7. Full Value Chain

Land → Farming → Processing → Logistics → Trading → Finance

Everything becomes an asset

8. Stablecoin

AgriUSD

Use cases:

- Payments
 - Trade
 - Salaries
-

9. DeFi

- Lending
 - Insurance
 - Yield
-

10. Moat

- Asset control
 - Liquidity control
 - Financial infrastructure
-

11. Roadmap

Phase 1: \$100M

Phase 2: \$1B

Phase 3: \$10B

12. Vision

AgriX will become the financial backbone of global agriculture
